So, I'm planning on attending this next week. Note participation by Becerra's staffer in review of governance.

Subject: AGENDA - Exide Technologies Advisory Group - Technical Working Session - February 16

Good Morning Exide Technologies Advisory Group Members and associated stakeholders,

Attached for your use, information, and distribution to other interested parties is the agenda for next week's Technical Working Session (February 16). As you will note and as we have recently discussed, a focus of the meeting is on proposed governance and the development of more specific descriptions of Advisory Group roles and structure.

We have contacted and are scheduling a preemptive meeting with the Advisory Group's Governance Subcommittee (Irvin de la O, Irving Pacheco, and mark! Lopez) as they volunteered to provide an initial review of proposed governance text. If anyone else is interested to participate in this discussion, please contact me and Ana Mascarenas of DTSC (ana.mascarenas@dtsc.ca.gov). We hope to have this hour long discussion late this week or early next week.

In closing, I look forward to seeing you and supporting your important work. Please contact me with questions and comments.

All my best
